**Check all that apply:**

<input type="checkbox"/> Commercial	<input type="checkbox"/> UF Extension
<input type="checkbox"/> Homeowner	<input type="checkbox"/> UF Research
<input type="checkbox"/> Public	

**Send results to:** \_\_\_\_\_

Processing fees per sample:  
Standard PCR & Sequencing: \$75

This is a universal test for phytoplasmas and is intended for non-palm plant species. The recent detection of ‘*Candidatus* Phytoplasma brasiliense’ (CPB) in weeds has highlighted that there are other phytoplasmas throughout Florida that could pose a risk to ornamentals and agriculture. This test will detect CPB as well as other phytoplasmas that are found in non-palm host plants. The testing results will be e-mailed to the submitter within 5-10 working days from receipt of the sample(s) to be tested. Please email me at [bbahder@ufl.edu](mailto:bbahder@ufl.edu) for host specific sampling instructions.

**Number of Samples:** \_\_\_\_\_ **Amount enclosed:** \_\_\_\_\_

*\*Please make checks payable to ‘University of Florida’ and enclose with the plant sample and send to FLREC\**

*Note: Samples cannot be processed until payment is received.*

**Sample Information** (\* indicates mandatory information):

*County	*City	*Date sampled	Date sent	*No. of plants affected	*Date of symptoms	*Host Species

**Symptoms:**    Yellowing    Bunchy top    Decline  
                    Witches’ broom    Phyllody    Other – please describe in comments

**Comments:**
